Green Campus Policy

Preamble

A campus that promotes sustainable practices through education and the environment is called a green campus. To develop a sustainable campus environment through effective resource usage and conservation efforts, green policy is necessary.

Objectives

- To effectively utilize potential environmental resources
- To encourage environmentally responsible behavior in order to facilitate efficient environmental governance
- To promote waste reduction, energy saving, and environmental preservation efforts

Policy Statement

- To promote sustainable growth, minimal usage of water, energy and other resources to achieve sustainable development are practiced regularly.
- Effective conservation techniques for establishing green coverings include rain water harvesting system and waste water treatment plant.
- To create a green and clean campus, energy-saving techniques are employed such installing LED lights with sensors and solar rooftop panels and a biogas plant.

- Awareness are created among students, parents and staff to use battery operated vehicles for transportation inside the campus.
- In order to raise awareness among the public and stakeholders, National and International environment days are observed.
- On campus, plastic bags smaller than 50 microns are not allowed. There is a complete restriction on using plastic plates and cups on campus of lower microns.
- It is advised to use eco-friendly materials like jute, cloth bags, and files.
